Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

This is not a good time for the Federal Government to attack my family's finances. We are having it rough enough. Part of the Bush campaign was that there would be no tax increases. I voted for him. Were you people asleep? This is not what your President promised me. What are you, a bunch of Democrats?

Keep the USF Fair!

Sincerely,

Barry Kitts
